

## SAS CONNECTORS/SATA/ESATA

### FEATURES:

- For designs of high-speed serial storage interfaces
- Up to 6 gigabit/sec transfer rate
- Better air flow through the chassis with thinner cables
- Point-to-point connectivity architecture
- Smaller and more flexible serial design
- Connector retainers for mechanical strength
- Supports dual porting capability, faster speeds

### APPLICATIONS:

- Enterprise Storage System
- Servers
- RAID Backplane
- Desktop

### OVERVIEW:

Xmultiple manufactures a wide range of SAS plug and receptacle connector configurations with right angle, vertical or SMT options, Used in many applications including: servers, desktops, RAID systems, storage blades, backplanes, HDD carriers and HDDs. The SAS backplane connectors also feature stamped retention clips that provide additional mechanical strength for excellent PCB attachment.

Xmultiple's SAS connectors are designed for hot plugging and blind mating of HDDs. Xmultiple SAS products are capable of up to 6 Gb/s data speed based on SI tests performed.

### ORDERING INFORMATION:

PART NO.X	Description
XSAS-359000	SAS Connector
XSAS-358000	SAS Connector
XSATA-443000	SATA Connector
XESATA-456000	ESATA Connector
