

FocalPoint

Position USB Cable In The Direction You Desire

FocalPoint-USB™ Cable rotates and bends in the direction you want.

FocalPointUSB™ Cable provides a means to position the cable in the direction you choose. USB ports on laptops computers and desktops computers are often on the sides or the front of these units, which means the USB cable is taking up the desktop space. The typical bend radius of standard USB cables is 4 inches or more. With FocalPoint USB cables the bend radius is only 1.7 inches.

FocalPoint USB Cables Works With All USB Devices:

Works with all USB devices:
including USB 2.0 (Hi-Speed)
