

iXP1-500 Guidelines

Read the following guidelines carefully before using the iXP1-500.

iXP1-500 adapters are not Water Resistant

iXP1-500 adapters are not water resistant. Should moisture get in your iXP1, the unit should be dried completely before using. If the iXP1-500 is submerged in water do not attempt to use the iXP1-500 or you may run the risk of electrical shock.

Restricting Children Access to your iXP1

iXP1 adapters are not recommended for use by small children under 10 years of age. Small objects like the iXP1-500 are something they may put in their mouth.

iXP1 USB Power Connector Adapters

iXP1 connector adapters are designed for USB connector styles and type A connectors use on USB ports on laptop and desktop computers.

Avoid Dropping or Impacting Your iXP1-500

Dropping or excessively impacting the iXP1-500 will cause damage.

Connecting & Disconnecting

To connect or disconnect your iXP1-500 power adapter you must place your fingers on the housing of the iXP1-500 and do not remove by pulling from the USB cable.

Step 1: iXP1-500 Overview

Congratulations on your purchase of the Xmultiple iXP1-500 USB Power Adapter

Thank you for purchasing the iXP1-500. With the iXP1-500 you can now charge your pad computer with a USB port on your laptop or desktop computer. iPad users know iPad charging with a USB port is in most cases not feasible – The iXP1-500 solves this problem

Users of non Apple computers and some Apple computers cannot charge the iPad unless they use an electrical wallplate. The 10W Power Adapter which is packaged with the iPad is required if a user wants to charge the iPad. Therefore, to charge the iPad you must use a wall outlet.

Unless you have a 2.0 USB connector on your laptop or desktop which will operate with the iPad for charging. Apple states on their website that some USB 2.0 ports and accessories do not provide enough power to charge the iPad. When this occurs the message "Not Charging" appears in the status bar next to the battery icon. This appears to happen in most cases.

As it turns out the iPad will not charge through USB ports on non-Apple computers. iPad charges just fine through the wall charging brick and accompanying USB data cable. The iPad charges just fine when connected to USB ports on iMac, MacBook Pro.

Step 2: Charging Your Pad Computer with Your iXP1-500

Getting Started

No large manual is required with the iXP1-500 because it is so easy to use.

1. Turn on the power to your personal desktop computer or laptop.
2. Attach the iXP1-500 female Type A USB connector to the male Type A USB connector on your USB cable which is include with your pad computers.
3. Insert the iXP1-500 male Type A USB connector into the female USB port of your desktop computer or laptop.
4. Your pad computer will start charging. Check the battery charging status on your pad computer to verify it is charging.
5. Charge your pad computer until its power charge indicator shows you have a 100% charge. Listed below are IXP1-500 benefits.

- Female USB Type A connector to attach to your existing Apple USB cable's male USB Type A connector
- Remove iXP1-500 to sync
- Male USB Type A connector to attach to your computer
- Integrated patent pending circuit to support the iPads power requirement
- White Color to match your white Apple charge/ sync cable
- Black Color also available
- Works with car adapters and most hubs
- Attractive Packaging & Small compact form factor
- Protective Cover

iXP1-500 is Patent Pending

The iXP1-500 is a patent pending product with a power circuit which is unique. Most iPad users are going to want to purchase multiple units.

Xmultiple is known worldwide for our '4,978,317' patent for integrated lights in RJ connectors. The next time you plug in the networking cable for an Internet connection to your computer or networking device, you will see our blinking lights. We also would like you to check out our XP1Power cables which have an integrated rechargeable battery in the USB charging/sync cable. The XP1Power will charge almost any cellphone, smartphone, wireless headset and many other battery powered devices.

iXP1-500 Solution

The iXP1-500 adapter has been designed to solve the USB power with an inexpensive solution. Simply attach the iXP1-500 adapter to your existing Apple USB cable and your iPad will charge from your computer's USB port – Guaranteed. The iXP1-500 charges the iPad using the USB port on the user's computer. No need for a wall outlet. No more frustration. iPad is a trademark of Apple Inc.
