## PRESS RELEASE

### **Xmultiple Announces XP1Power Universal All-In-One Cable with iXP1 Interchangeable Connectors Providing Power for All Your Devices While On the Go**

**Patent-Pending XP1Power All-In-One Universal Rechargeable Battery Backup, Surge Protector, Sync/Charging USB Cable**

**LOS ANGELES, CA, January 27, 2010-** – Xmultiple, a global manufacturer of connectivity products releases XP1Power Universal Cable with interchangeable connector adapters for use with smartphones, cellphones, MP3 Players, GPS, PDA, Wireless headsets, MiFi, gaming controllers and more.

The Universal XP1Power Cable answers the power source needed for all your devices and unlike other charging devices the interchangeable iXP1 connector

adapters provides a rechargeable backup integrated battery to charge over and over again.

With the XP1Power users use the USB port on their computers to charge the XP1Power cable. The All-In-One Universal XP1Power cable lets users carry one device to have power on the go. Unlike other products in the marketplace the patent pending Universal XP1Power cable charges and synchronizes. The integrated 2500mAh lithium-ion battery is the industry's highest rated battery charger for a USB device. Most charges only have between 1200-1800mAh battery and add bulk but not XP1Power. The Universal XP1Power cable now provides the answer for users for a high capacity power source in a compact size integrated into the sync/charging cable.

The Universal XP1Power cable is with interchange iXP1 connector adapters so you can use one cable and easily change the connector adapters for use for all of your devices. Simply change iXP1 connector adapters by inserting them on the XP1Power cable. Most connectors are manufactured by Xmultiple for the iXP1 and if they are not available today they will be release in the near future. The miniUSB, microUSB and Apple iPhone/iPod connector adapters are currently available. The microUSB connector is used by thousands of products and is becoming the connector standard for most products.

#### **Mini-USB type A iXP1Connector Adapter**

#### **Micro-USB type A iXP1Connector Adapter**

#### **iPhone/iPod iXP1Connector Adapter**

**iXP1 cable connector adapters and XP1Power Cables Provide Charging and Battery Backup Power for Devices including Cellphone's, SmartPhone's, Global Positioning Systems (GPS), Wireless Headsets, Gaming Devices, PDA's, Handsfree Speakers, Camera's, MP3 Players and More**

*Comment from Alan Pocrass, CEO, Xmultiple*

" Users of iPhone's/iPods and other smartphone's who are high demand power users of Wi-Fi, Internet connections and bluetooth use, now have the power they need when they are mobile. Now with the release of the Universal XP1Power cable and iXP1 connector adapters user will have power when they are on the go and power is no longer an issue for multiple devices they use during the day. The Universal XP1Power cable can charge their devices over and over again. "

The XP1 will retail for \$49.99 and the iXP1 connector adapters pricing is \$4.99 each. The Universal XP1Power cable is packaged with one microUSB connector which is becoming an industry standard for most devices. The Universal XP1Power cable will be available from many leading retail outlets including computer retailers, cellphone retailers and other electronic stores as soon as possible. To purchase today, our distributors carry stock and will take orders online or by telephone.

***The Ultimate USB Rechargeable Battery Backup Charge/Sync Cable***

*A rechargeable lithium-ion battery integrated in the Universal XP1 Power charge/sync cable lets you have additional portable power when you need it, "when" you're away from a power source.*

If users of portable devices go mobile and are away from a power source or their device is showing low on juice, they have a powerful back-up power source. When users do not have the time to charge their portable devices they just plug the Universal XP1Power Cable in and it will charge in no time.

Many new electronic devices require a considerable amount of power to run them which puts a large amount of drain on the battery. It is easy to end up with no juice. Finding the time and/or place to re-charge is not an option many times. What we have done is given the consumer the comfort of knowing that they will always have a back-up power source within reach, their Universal XP1Power Cable charge/sync cable with an integrated rechargeable 2500mAh Lithium-ion battery.

The Universal XP1Power cable is 12 inches in length but users do not need to worry because they can easily plug in an optional 30 inch extension cable if they want it longer. The iXP1 adapter cables and the 30 inch extension cable simply

attach to the Universal XP1Power cable with our patent pending interchangeable attaching cable system.
