Since I don't have an iPad, I never really experienced the problem of [charging the iPad \(http://www.mobilewhack.com/apple-ipad-dock-connector-to-vga-adapter/\)](http://www.mobilewhack.com/apple-ipad-dock-connector-to-vga-adapter/) on a non-Apple computer or older hardware.

However, if you want, you could just get the iXP 1-500 [USB adapter \(#\)](#) from XP-1 Power, and attach it to the iPad's sync cable and the USB port on any [PC \(#\)](#), and the iPad to charge no matter what the [hardware \(#\)](#).

Not bad for just \$5.
