iXP1-500 iPad Adapter

iXP1-500 iPad Adapter

iXP1-500 iPad adapter solves the problems iPad users have charging from their USB port on their desktop and laptop [computers](#).

Quote:

iXP1-500 iPad Adapter

iXP1-500 iPad adapter solves the problems iPad users have charging from their USB port on their desktop and laptop computers.

iPad Charging with a USB port is in most cases not a solution – The iXP1-500 solves this problem

The iPad has some cable charging issues which have not been fully resolved. There is a problem related the way the iPad charges with a computers USB port. Users of non Apple [computer](#) and some Apple computers cannot charge the iPad unless they use an electrical wallplate. The 10W Power Adapter which is packaged with the iPad is required if a user wants to charge the iPad. Therefore, to charge the iPad you have to be a slave to a wall outlet.

Unless you have a 2.0 USB connector on your laptop or desktop which will operate with the iPad for charging. Apple states on their website that some USB 2.0 ports and accessories do not provide enough [power](#) to charge iPad. When this occurs the message "Not Charging" appears in the status bar next to the battery icon. This appears to happen in most cases. As it turns out the iPad will not charge through USB ports on non-Apple computers. iPad charges just fine through the wall charging brick and accompanying USB data cable. The iPad charges just fine when connected to USB ports on iMac, MacBook Pro. However the non-Apple as a whole have a problem.

- * The iPad does not charge correctly when connected to a [PC](#).
- * The iPad does not charge correctly when connected to an older MacBook Pro (pre-Unibody).
- * The iPad does not charge through USB hubs, regardless of what the hub is connected to (PC or Mac)

- F/S Gateway P6831FX ... **\$799.00**

The iXP1-500 adapter has been designed to solve the USB power with an [inexpensive](#) solution . Simply attach the iXP1-500 adapter to your existing Apple charge/sync cable and your iPad will charge from your computer's USB port – Guaranteed. The iXP1-500 charges the iPad using the USB port on the users computer. No need for a wall outlet. No more frustration.
