The iPad can be charged via USB using the proprietary charge/sync cable. But on older Macs, and worse, in some modern PCs, sometimes the darned thing won't charge. It seems that the problem is that the iPad doesn't get enough power from the USB ports of slightly older machines. By slightly older I mean even...

[ipod & iphone cable lights up while charging](#)

I don't know why there aren't more cables that light up, but I have to say that these iPod/iPhone charging cables look pretty sweet.

This cable runs from your iPod or iPhone to your computer or power plug. You'll see neat lights running along the cable while it's charging. The lights stop moving once the...

One of the things I really hate is when my iPod runs out of power. There's nothing much you can do about it, if you haven't prepared for this. However, if I had the choice of portable rechargers, I'd most definitely go for the MintyBoost.

What is the MintyBoost? It's a stylish and easy way...
