Overview:

Convenience to charge your iPad with you USB port on your computer and any other charger as well.

The iXP1-500 iPad Charging Adapter is the a small form factor and solves the problem of charging through any USB port. You no longer have to be held back by Apple's restriction of not being able to charge your iPad on a standard USB port if you do not own a Mac. The iPad Charging Adapter makes charging easy without the limitation of finding a wallplate. The iXP1-500 provides you with the means to charge in any way you want with your computer. PC users will find that if they own an iPad this product is a "must have" product.

Works with all the Apple iPad - any version
